# 1 Applicable PC system

Applicable PC system: WIN 7 SP1 or above, WIN 10/WIN 11 4 cores 8G or above

## 2 Download software

1. Enter the EPEVER software download URL:

<https://www.epever.com/support/softwares/>

2. Download the Solar Guardian installation package and unzip it.

## 3 Installation procedures

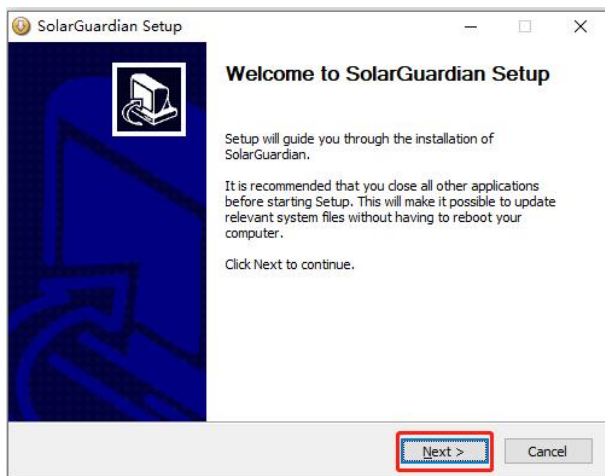

1. Open the Solar Guardian installation package, and double-click the Solar Guardian icon to open the installation software.

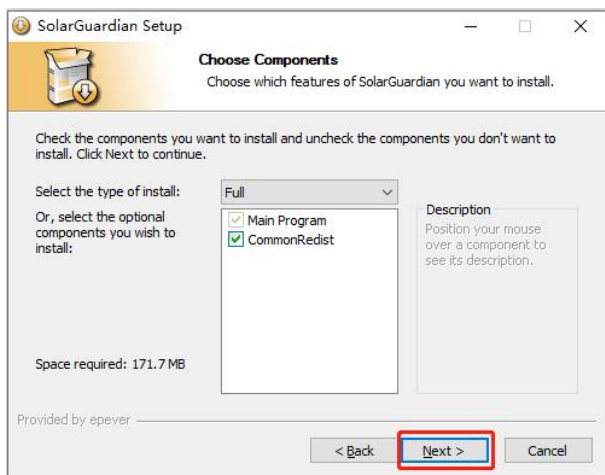

2. Select the installer language and click OK to continue.

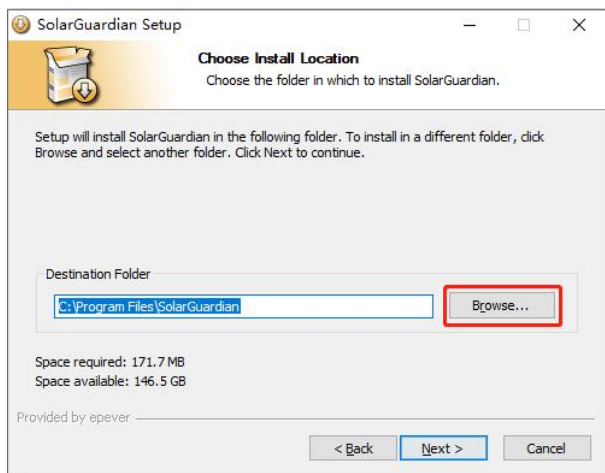

3. Enter the Solar Guardian Setup page and click Next to continue.

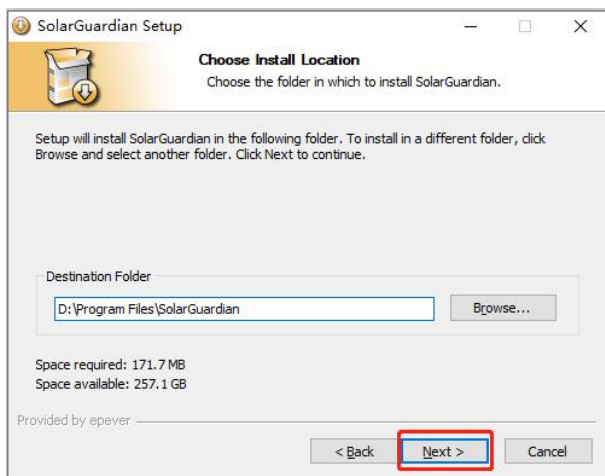

4. Enter the "Choose Components" page, and check the components you want to install (or keep the default selection). And then click Next to continue.

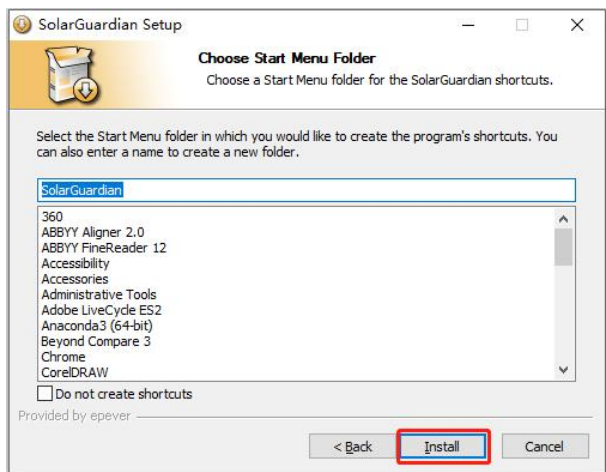

5. Enter the install location and click Browse to select the location where the Solar Guardian is installed.

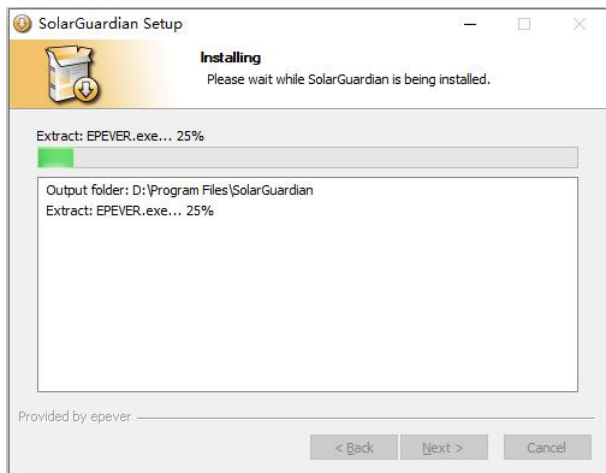

6. After selecting the install location, click Next to continue.

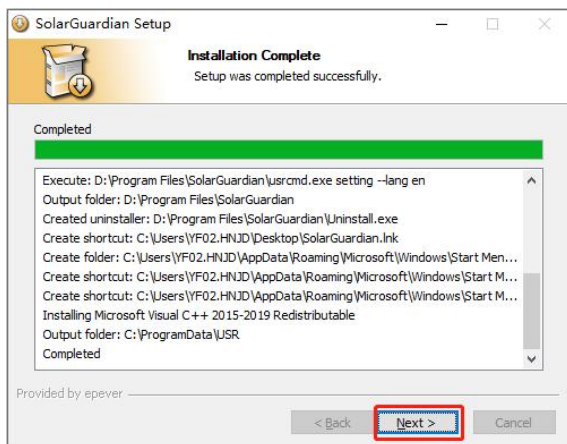

7. Enter Solar Guardian's shortcuts creation page and click Install to continue.

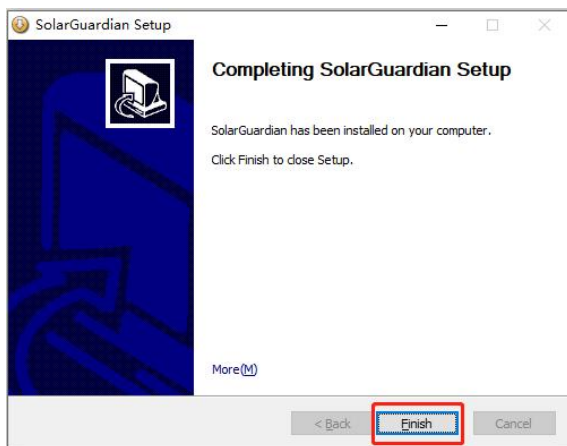

8. Enter the auto-installing page.

9. After the progress bar is completed, click Next to continue.

10. The following page will show; click Finish to complete the whole installation.

11. The Solar Guardian's shortcut will display on the PC desktop.
